Creating winning conditions for the home team

No matter if it's the deciding football penalty or a baseball home run, the players benefit from an excellent turf. Partnering with Husqvarna will help you produce results that'll make groundskeepers and players alike happy. In our autonomous mower offering, you'll find machines specifically adapted for sports turf care, as well as maintenance equipment that may make the workdays easier. Because when the game is on, the players deserve the best conditions to play it.

This brochure gives a quick overview of our broad range. For all product details, technical data and prices, visit husqvarna.com

› Consistent results – every day

Regardless of if you need to mow a single football pitch, multiple pitches and training areas or a tricky area around the clubhouse – there’s always a Husqvarna robotic mower perfectly tailored to the task. The mowers work tirelessly, continuously, according to a schedule set by you, and can deliver consistently impressive results.

› Lower the cost, improve the results

Robotic mowers can help deliver excellent results on different types of areas. Steep slopes surrounding the club house? No problem. Complex areas? Easy as a walk in the park. The total ownership and service cost may also be lower than re-investing in conventional machines.

› Time to perfect the details

Our autonomous mowers operate day and night and require minimal attention, freeing up your staff to finally undertake those other important jobs around the pitch. From allowing your staff to perfect the finish to taking care of the surroundings, our mowers help you create an outstanding player and visitor experience.

› Mowing that shows that you care

Imagine being able to mow parts of the pitch while your team’s players continue their training session uninterrupted. Our autonomous mowers mean no more sound pollution, no fumes from diesel engines, and no more waiting for big ride-on mowers to complete a task, keeping the players – and the coach – happy.

Specifically designed for sports field maintenance

Husqvarna autonomous turf care solutions are designed to handle a wide variety of areas on and around your sports field. You monitor and control your entire fleet of robotic mowers through a single app in Husqvarna Fleet Services™. Wire-free mowing is enabled by Husqvarna EPOS® satellite navigation, now with new connection options. With greater flexibility, easier management, and precision tailored to your course, Husqvarna delivers a truly comprehensive solution for sports pitch maintenance.

A product range ready for your club

No matter the size or layout of your playing fields, there's a suitable Husqvarna robotic mower. For single pitches, Husqvarna Automower® 580 EPOS® robotic mower has been specifically developed for sports fields with its powerful 80W motor. Multiple pitches and larger areas are efficiently maintained with the high-capacity Husqvarna CEORA® mowers.

Consistently excellent results

The robotic mowers cut the grass every day with high-quality blades. This not only supports a premium result and finish but can also help support a healthy turf. Thanks to the machines' light weight they may contribute to less compaction of the ground, and to making it possible to mow during very wet conditions.

Easy maintenance

Husqvarna robotic mowers can help you save on both time and expenses when it comes to maintenance. With one press of a button in the app, you can send all mowers simultaneously to the service station. Once there, you easily wash them off, switch blades and wheel brushes if necessary – then send them back out to work.

NEW!

Satellite guidance with three ways to connect

Husqvarna robotic mowers are controlled via our satellite-based system, EPOS®, that uses RTK-GNSS technology. The latest additions to the system are Husqvarna Cloud and our 4G reference station. Set the area you want maintained, then the fully cloud based system or the physical reference station will safeguard the exact positioning. The reference station is even more exact than the cloud-based solution. Read more on page 8.

HUSQVARNA FLEET SERVICES™

Seamless control in one single application

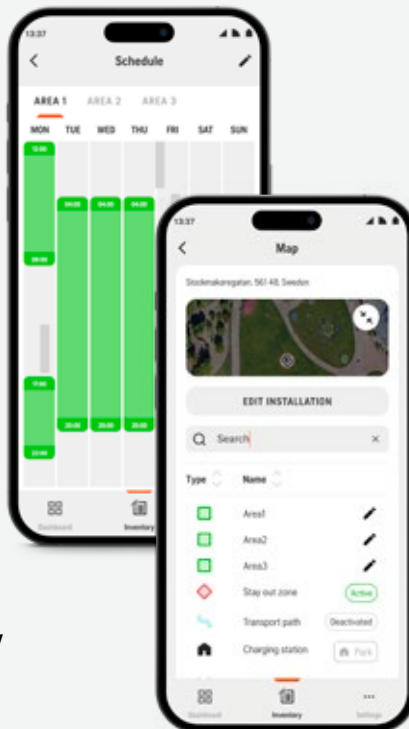

Husqvarna robotic mowers are controlled in our smart fleet management system. You easily get a comprehensive overview of their status and position, straight in your device or on desktop. In the app, you can easily:

- › Set mowing schedule
- › Install and edit working areas
- › Send batch commands to multiple mowers

EXPLORE ONLINE

Find out more about how Husqvarna Fleet Services™ makes your workday easier by visiting husqvarna.com/FleetServices

Easily edit the areas

If you need to exclude an area, you easily set a stay-out zone, for example if there's a part of the training ground that's occupied with an event. You edit the work area boundaries directly on the map in the app.

All info on all your devices

The system synchronises your data, ensuring that you have access to all your information whether you are working from a mobile device or desktop/computer.

A star-studded lineup ready for play

No two sports pitches are the same. And that's just as it should be. Every field, every area comes with its own character, its own tests of strength when it comes to mowing and turf care. That's why we've developed robotic mowers specifically adapted to sports field maintenance, mowers that will help bring out the very best in your playing field, both for the home team and the visiting players, no matter the challenges.

LEARN MORE

Informed decisions start with data

The lifecycle CO₂ emissions of Husqvarna CEORA® robotic mowers are up to 83% lower than a P 525DX ride on front mower. This has been proven by third-party LCA. Explore the findings at husqvarna.com/LCA or scan the QR code

FOR LARGE AREAS

Husqvarna CEORA® 546 EPOS®/544 EPOS® with RZ 43M

Specifically developed for large area coverage, Husqvarna CEORA® robotic mower has a capacity of up to 25,000 m² in 24h – depending on area type and mowing frequency requirements. Multiple mowing heights for the playing field and the training grounds, make it possible for CEORA® robotic mowers to seamlessly move between different parts of your club, changing patterns or height to fit the needs of each area.

- › Area capacity: up to 25,000 m² (in 24h)
- › Cutting height: 20–70 mm
- › Selectable mowing patterns
- › IPX5 protected – hose washable
- › Handles slopes up to 20% (11°) incline
- › Up to 25% slope with terrain wheels
- › FOTA – firmware over the air

FOR HIGH QUALITY PITCHES

Husqvarna Automower® 580 EPOS®

For single high quality pitches, Automower® 580 EPOS® robotic mower is the obvious choice. With its powerful 80W motor, floating heavy-duty cutting system, and quick release blade disc, it makes easy work of even the most demanding challenges. For multiple pitches or increased mowing efficiency, many Automower® units can be used side by side. For added object avoidance, Husqvarna's vision technology accessory is available for this model.

- › Area capacity: up to 8,000 m² (in 24h)
- › Cutting height: 20–60 mm
- › Selectable mowing patterns
- › FOTA – firmware over the air
- › IPX5 protected – hose washable
- › Active wheel brushes as an option
- › Handles slopes up to 45% (24°) incline

FOR SINGLE TRAINING PITCHES

Husqvarna Automower® 560 EPOS®

Ideal for sports training pitches, Automower® 560 EPOS® robotic mower is the perfect companion to its more playing field-focused siblings. Thanks to its pivoting front-wheel axle, the mower easily handles uneven surfaces and slopes up to 50% incline, making it ideal also for areas outside of the sports fields. For added object avoidance, Husqvarna's vision technology accessory is available for this model.

- › Area capacity: up to 6,000 m² (in 24h)
- › Cutting height: 20–60 mm
- › Selectable mowing patterns
- › FOTA – firmware over the air
- › IPX5 protected – hose washable
- › Active wheel brushes as an option
- › Handles slopes up to 50% (27°) incline

Taking care of all your sports field needs

Depending on the size of your club and the number of pitches you're tasked with maintaining, different setups – all aimed at delivering the combination of a perfectly cut turf and maximised free time for play or training. Below are a few setup examples and an approximation of the time. More configurations are, of course, possible.

Proposed setups for daily mowing (24 hours)

 7,500 m ² pitch [*]	Mowing time ^{**}	Optional solutions
15 hours pitch availability ^{***}	9 hours	1 × CEORA [®] 544 EPOS [®] + RZ 43M 
12 hours pitch availability ^{***}	12 hours	2 × Automower [®] 580 EPOS [®] 
9 hours pitch availability ^{***}	15 hours	2 × Automower [®] 560 EPOS [®] 

^{*}1 pitch of 7,500 m² ^{**}Mowing time has been calculated using systematic mowing. ^{***}Pitch availability = Hours open for play, irrigation, and maintenance = total time minus mowing time.

 15,000 m ² pitch [*]	Mowing time ^{**}	Optional solutions
15 hours pitch availability ^{***} per pitch ^{****}	9 hours	1 × CEORA [®] 544 EPOS [®] + RZ 43M 
12 hours pitch availability ^{***}	12 hours	4 × Automower [®] 580 EPOS [®] 
9 hours pitch availability ^{***}	15 hours	4 × Automower [®] 560 EPOS [®] 

^{*}2 pitches of 7,500 m² each, in total 15,000 m² ^{**}Mowing time has been calculated using systematic mowing. ^{***}Pitch availability = Hours open for play, irrigation, and maintenance = total time minus mowing time. ^{****}CEORA[®] alternates between the pitches.

 22,500 m ² pitch [*]	Mowing time ^{**}	Optional solutions
16 hours pitch availability ^{***} per pitch ^{****}	9 hours	1 × CEORA [®] 546 EPOS [®] + RZ 43M 

^{*}3 pitches of 7,500 m² each, in total 22,500 m² ^{**}Mowing time has been calculated using systematic mowing. ^{***}Pitch availability = Hours open for play, irrigation, and maintenance = total time minus mowing time. ^{****}CEORA[®] alternates between the pitches.

HOW IT WORKS

Husqvarna EPOS[®] satellite guidance

Husqvarna EPOS[®] (Exact Positioning Operating System) utilises satellite signals to create virtual boundary lines. Position is calculated through RTK GNSS technology, and so called correction data is distributed to the mower in different ways – depending on preference and application.

Three ways to send correction data:

NEW!

EPOS[®] RS 4G reference station

- › Correction data over 4G
- › One single station needed (range up to 25 km)
- › Accuracy typically 1–2 cm (within 10 km range)
- › Requires cellular coverage on the site

NEW!

EPOS[®] via Husqvarna Cloud

- › Correction data over 4G Cloud
- › No need for physical installations
- › Accuracy typically 1–6 cm
- › Requires cellular coverage on the site

EPOS[®] RS5 reference station

- › Correction data over short distance radio (range up to 500 m)
- › Expand coverage by installing several EPOS[®] RS5 reference stations (in repeater mode)
- › Accuracy typically 1–2 cm

Complementing the game

NEW!

FOR SMALL, DEMANDING AREAS

Husqvarna Automower® 540 EPOS®

Robust and reliable robotic mower, built on a powerful 36 voltage platform, floating cutting system, and 40W cutting motor. Handles slopes of up to 50%, and navigates narrow passages, tough terrain even in rainy conditions.

- › Area capacity: up to 4.000 m² (in 24h)
- › Cutting height: 20–60 mm
- › Handles slopes up to 50% (27°) incline
- › Selectable mowing patterns
- › Husqvarna's vision technology accessory available
- › IPX5 protected – hose washable
- › FOTA – firmware over the air

FOR SMALL, COMPLEX AREAS

Husqvarna Automower® 520 EPOS®

Robotic mower designed for smaller areas. Handles complex turfs and navigates narrow passages, obstacles, tough terrain and slopes with ease.

- › Area capacity: up to 2.500 m² (in 24h)
- › Cutting height: 20–60 mm
- › Handles slopes up to 45% (24°) incline
- › Selectable mowing patterns
- › FOTA – firmware over the air

FOR EXTREME SLOPES

Husqvarna Automower® 535 AWD EPOS®

Our all-wheel-drive model easily handles rough terrain and slopes with up to 70% (35°) incline, helping you avoid challenging manual mowing in steep slopes. The excellent grip also contributes to reliable operation in diverse weather conditions.

- › Area capacity: up to 3.000 m² (in 24h)
- › Cutting height: 30–70 mm
- › 70% (35°) all-wheel-drive slope capacity
- › Selectable mowing patterns
- › Wire installation optional
- › FOTA – firmware over the air

Price excl. VAT 0.000 €
000 00 00-00

NEW!

Vision technology accessory

Husqvarna's vision technology – available with the new generation of Automower® robotic mowers – is an AI-supported camera feature that enables the robotic mower to visually detect and avoid obstacles on the turf, day and night. This option allows the mower to classify the type of detected object, for example a ball or football shoes, and keep mowing efficiently. It also enables nighttime mowing with precision.

NEW!

House accessory

Provides shade and protection against harsh weather while charging. Available for all Automower® models.

NEW!

Turf brush

The new turf brush accessory helps produce an excellent aftercut appearance by breaking up grass clumps and distributing clippings evenly.

Cutting discs and blades

The cutting discs have a quick-release design. You easily can prepare it in the workshop, for extra swift and smooth maintenance in the field, or at the service point. The Enhance HSS blades are made from carbon steel and have two cutting edges welded with high speed steel. Extra sharpness and longevity for use in tough grass areas.

Active wheel brush kit

The active wheel brush kit is an easy and effective way to clean grass from the wheels of Husqvarna Automower®. This improves traction and reduces clumps of grass left on the pitch.

Services by Husqvarna

An essential part of easy, trouble-free ownership is the peace of mind that comes from a trusted partnership. With Services by Husqvarna, you can easily lease the products you need, with no upfront investment costs, and with repairs and yearly service included. Or – if you wish to own your products – you can add a beneficial service contract that will provide you with the service needed to maximise that crucial uptime, keeping your sports field well-maintained and ready for play.

EXPLORE LEASE PLUS

For more in-depth information on Lease Plus, please visit husqvarna.com/LeasePlusPro

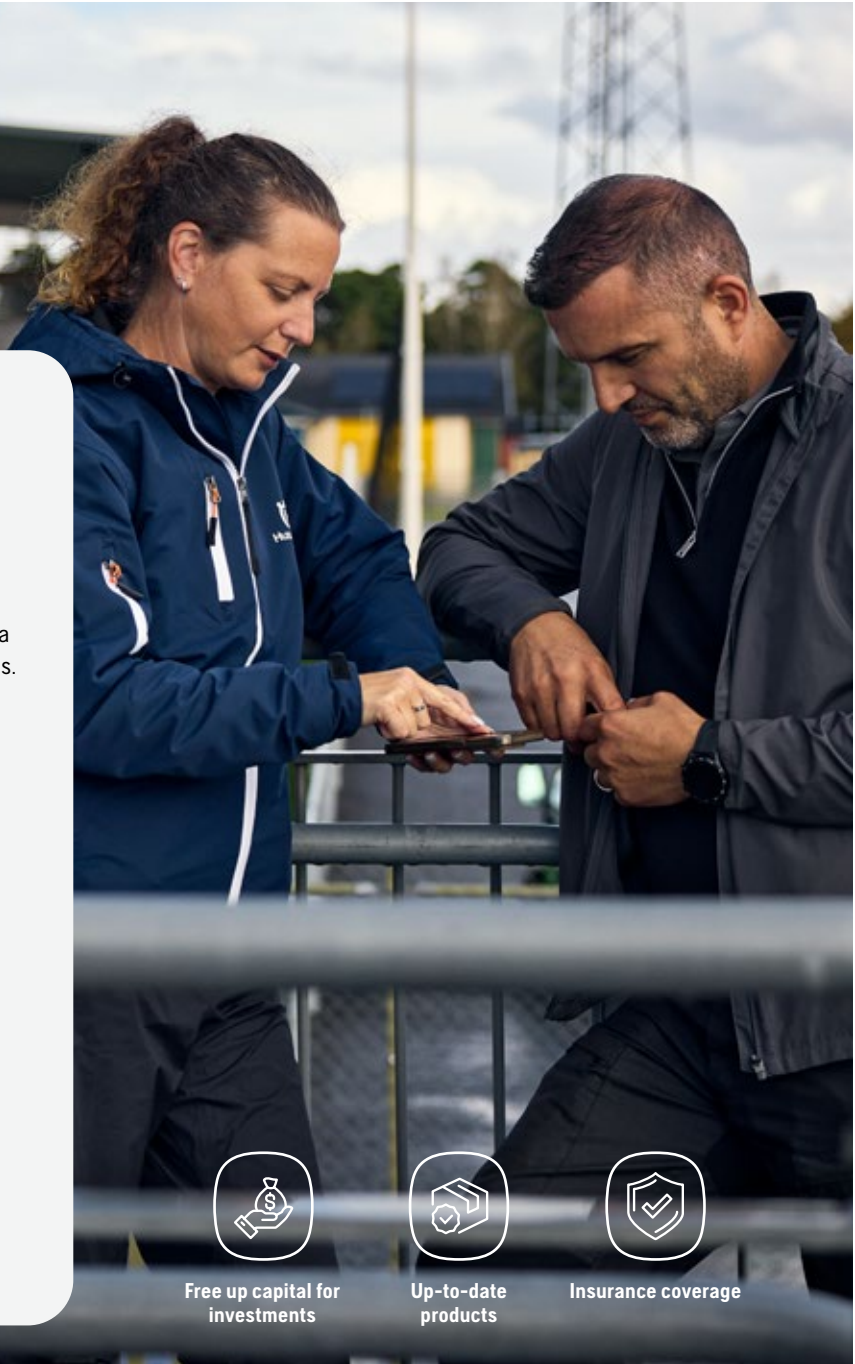

HUSQVARNA LEASE PLUS

Convenient financing of your equipment

Make a faster shift towards a more efficient operation with your Husqvarna products. With operational leasing, you get a convenient long-term rental without any upfront investments. The predictable and fixed monthly fee during the contract will help optimise the cash flow and financial planning of your business.

- › Up-to-date product
- › No upfront investments
- › Off-balance sheet item(s)
- › Comprehensive insurance coverage, including theft protection, flooding, lightning and vandalism
- › Repairs*
- › Planned maintenance according to set service plan
- › Software updates
- › Genuine blades for robotic mowers**
- › 3 or 5 years contract

*For more information about what is included in and excluded from the repairs, please see the applicable Terms and Conditions
 **Seasonal handout after maintenance; 45 pcs for Automower® and 300 pcs for CEORA® robotic mowers

HUSQVARNA WARRANTY PLUS

Extra protection for extra peace of mind

This additional protection service extends your time of worry-free ownership. Our extended warranty can be activated up to 30 days after product purchase and protects your investment with additional years of warranty added to the 1-year factory warranty – all at a fixed upfront price. For robotic mowers, the warranty can be extended by four years, whereas other machines and equipment can gain an additional year's warranty.

- › 1 or 4 years additional warranty*
- › Warranty repairs**

* Number of years varies depending on type of product

** Subject to the equipment having undergone planned maintenance as specified in the operator's manual

EXPLORE FRONT MOWERS

Find our entire range of front mowers and attachments by visiting husqvarna.com/FrontMowers

Husqvarna front mowers

Complementing our robotic mower offering, we also provide commercial, state-of-the-art, powerful front mowers with a wide range of exchangeable cutting decks and attachments, including a hybrid turf dethatcher.

Hybrid turf dethatcher

This front mower attachment is designed to effectively remove and collect thatch on hybrid grass, without damaging the reinforcement net. Instead of complete renovation, you improve the turf condition continuously, saving on cost and increasing accessibility. With regular dethatching, the renovation cycle for the hybrid turf may be extended up to 5–6 years, reducing both costs and closed-season time.

Husqvarna P525DX
with cabin

Husqvarna P 535HX

500-series front mowers

Our 500-series are commercial machines for full-time use, designed to maximise performance and productivity. They are robust, easily manoeuvrable, and built with rigid, reinforced heavy-duty steel ladder frames to handle heavy-duty tasks. Regardless of your choice of driveline, the 500-series delivers performance you can rely on, all year round.

Range highlights:

- › Rear articulated steering
- › Heavy-duty steel ladder frame
- › Front cutting deck options up to 180cm
- › All-Wheel-Drive
- › Dual power sources hybrid model (P 535HX)
- › Multiple attachments

Hybrid power:

Husqvarna P 535HX is a hybrid front mower that uses a diesel engine and electric motors to power hydraulics, wheel drive and PTO. It offers three operating modes – diesel, hybrid and electric (for transport). It can be equipped with high capacity cutting decks up to 180 cm as well as attachments.

- › Easy switch between diesel and fully electric drive
- › Hybrid mode (diesel engine running and battery buffer active)
- › Electric mode (used during transportation)

EXPLORE ATTACHMENTS

Find our entire range of front mowers attachments by visiting husqvarna.com/FrontMowerParts

Wide range of attachments

From the powerful PTO driven blower, via an efficient sprayer and brooms with collectors to snow ploughs – our front mowers are a versatile and flexible solution to an impressive range of challenges on your sports field or on the surrounding areas.

Explore our entire range of battery products at husqvarna.com/ProfessionalBattery

Grounds care maintenance equipment

For grounds crew work, the benefits of our comprehensive battery ecosystem are hard to match. The machines are well-balanced and lightweight to enhance operator comfort and be easy to work with, and the high-performance batteries deliver all the power you need. The smart charging options bring additional flexibility to the system.

AN EASIER WAY TO KEEP TRACK OF YOUR EQUIPMENT

 **HUSQVARNA**
FLEET SERVICES™

The benefits of Husqvarna BLi-X 36 V Battery System:

Purposeful design

All machines, batteries and accessories in our battery ecosystem have been designed with focus on the user and maximised efficiency. The system platform is developed to ensure optimal compatibility and performance for all types of jobs.

Scalable flexibility

The system's flexible design – with multiple machines and charging solutions – makes it easy to adapt for any work tasks. The high level of compatibility allows for smooth upscaling depending on seasonal needs or additions to your workload.

Hassle-free operation

The battery machines are easy and intuitive to use, allowing for easy onboarding of seasonal grounds teams or new operators. We offer several ergonomically designed options to carry the batteries, allowing you to work any way you want.

Combi machine

The versatile Husqvarna combi machine makes it possible to take on a variety of jobs. The wide range of click-on attachments can easily be switched, making the machine ideal for all-round green care tasks.

Battery-powered machines for every task

Our comprehensive range of battery machines can handle just about any task – from hedge and grass trimming, urban tree care work, mowing, to cleaning. All machines and batteries have options for Bluetooth® connectivity, making it possible to monitor them in Husqvarna Fleet Services™.

Trimmers and brushcutters

Lightweight, efficient grass trimmers for frequent trimming jobs, and high-performance brushcutters for efficient handling of larger areas with tough vegetation.

Hedge trimmers and pole hedge trimmers

Easily manoeuvrable battery hedge trimmers with high-quality knives. Trim cut configuration for frequent trimming, coarse cut for overgrown hedges, pole hedge trimmer for high, wide, and low hedges.

Blowers

Our high-performance blowers deliver efficient cleaning results. Available in both compact handheld and backpack configuration.

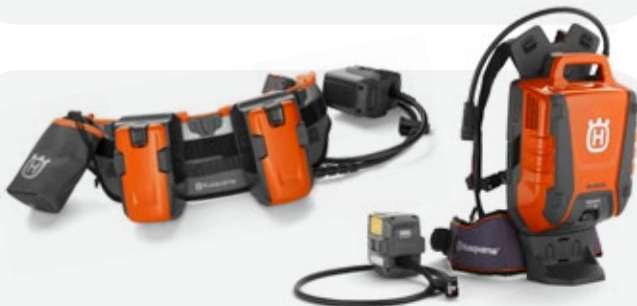

Battery performance to rely on

Husqvarna batteries are specifically developed for demanding commercial use. Thanks to the state-of-the-art design, the batteries deliver continuous power throughout the optimised runtime. Active cooling helps to extend battery lifetime and built-in connectivity for easy connection to Husqvarna Fleet Services™.

Smart charging options

With our charging rail, you can charge up to eight batteries simultaneously – perfect for overnight charging. The fast chargers help to handle peaks during the work day, while the portable Multi-bay charger is perfect for longer in-field work.

Flexible carrying possibilities

Run your equipment with the battery in the machine for maximum agility, in your hip belt for great weight distribution, or with a backpack battery for maximum runtime.

Storage and transportation

For efficient storage and convenient transport of batteries to and from the workshop, we offer a series of robust and practical cases.
